Located in Northwestern Ontario, Canada, Domtar’s Dryden mill produced its first unbleached pulp in 1913. More than 100 years later, the mill still produces Northern Bleached Softwood Kraft pulp. Obtained from third parties and designated wood supply allocations, the mill’s softwood fiber is suitable for a variety of uses including premium paper towel and tissue, as well as specialty paper grades.

Since 1957, the Dryden Mill’s Conservation Camp has educated students from Dryden High School, focusing on resource management and conservation concepts.

In 2018, the Dryden Mill contributed more than $66,000 in grassroots giving to the local community.

The Dryden Mill supports more than 300 local jobs.

Domtar’s Dryden Mill has an estimated regional economic impact of $531 MILLION.
