

Guthrie, Jeremy (Crofton)

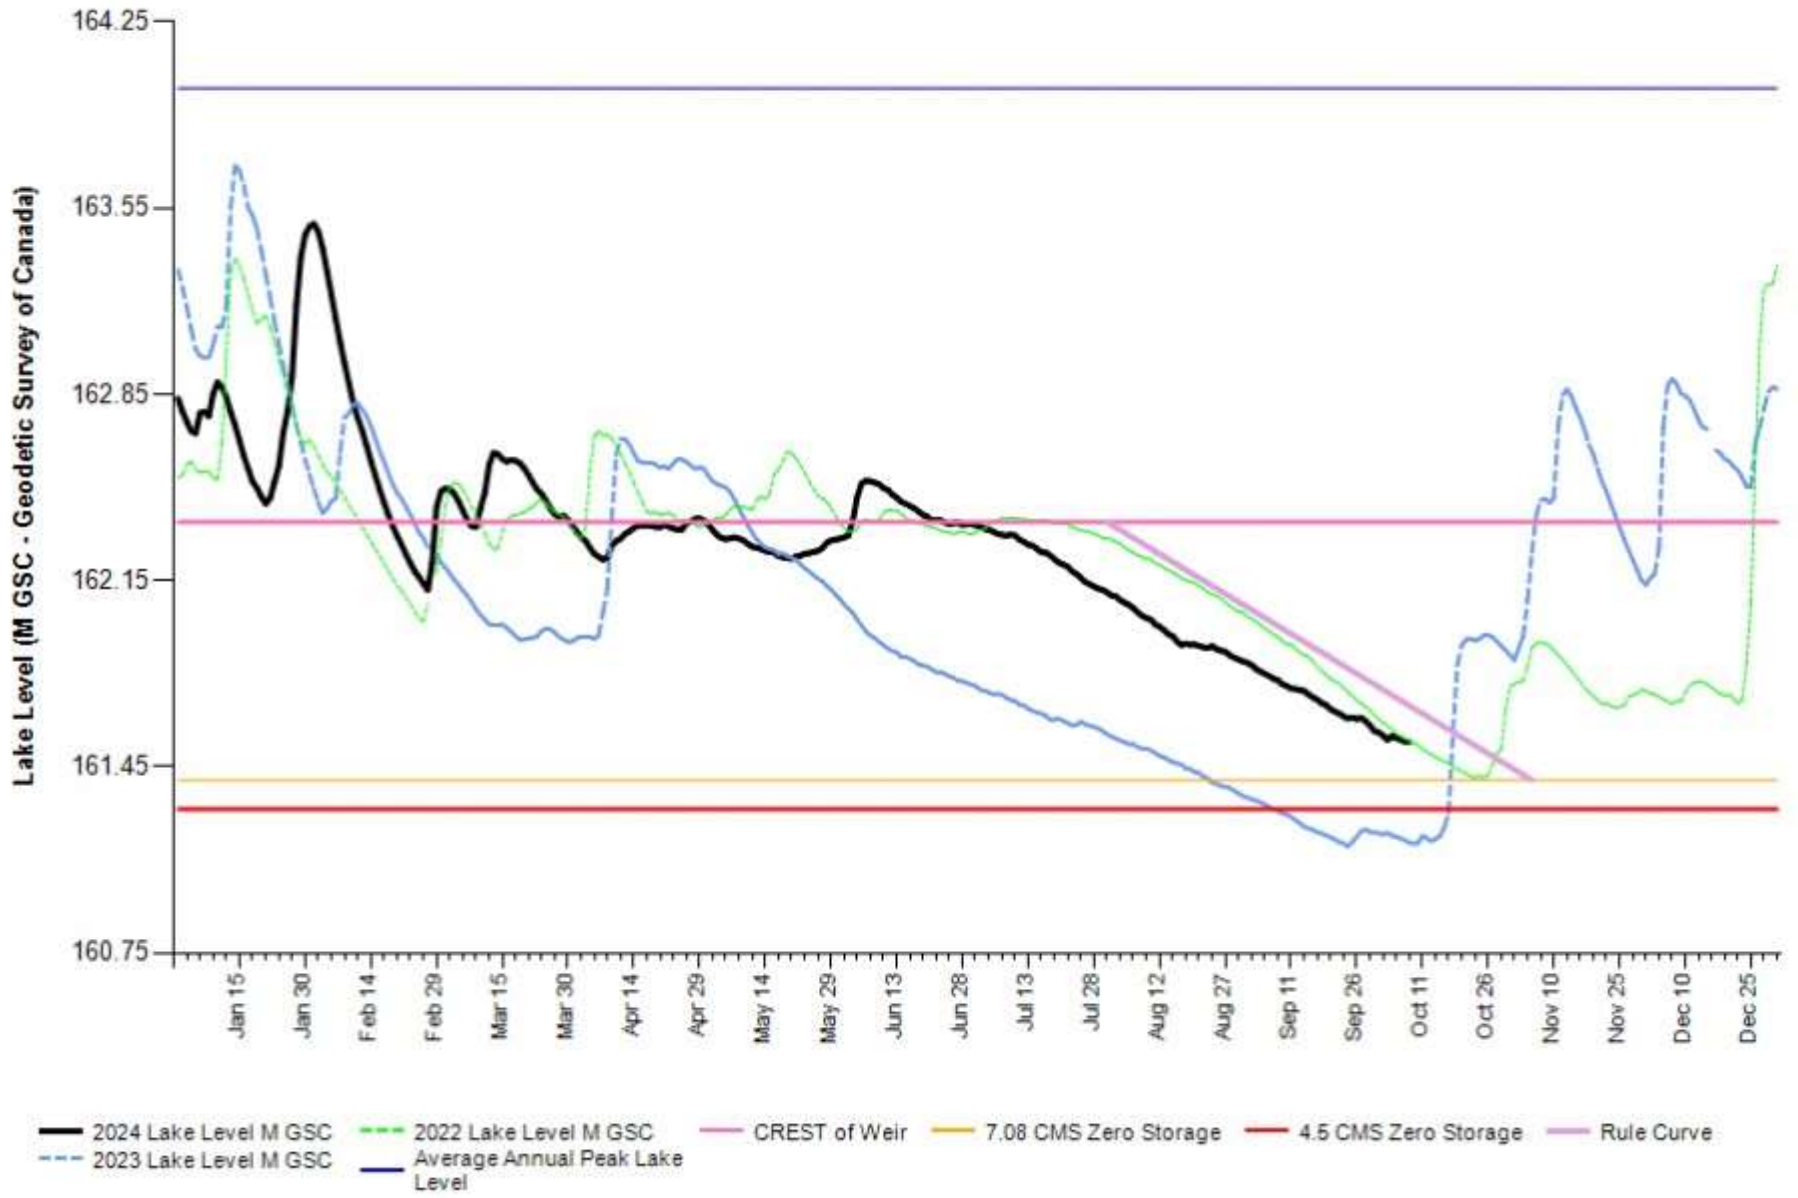

Good afternoon everyone,

I hope you're having a wonderful day so far. Brian Houle is currently away on vacation this week, and I will be updating the group in his stead. Weather conditions are due to be fairly wet, with a significant increase in precipitation expected over the next several days. Current weather predictions show rain today and Wednesday, with significant rainfall expected from Saturday through to Monday. We are currently holding at the prescribed 7cms river flow, with plans to increase the flow if the lake level increases. Currently, lake levels are approximately where they were at this time in 2022 and we will be monitoring the lake level against the rule curve to ensure optimal river flows

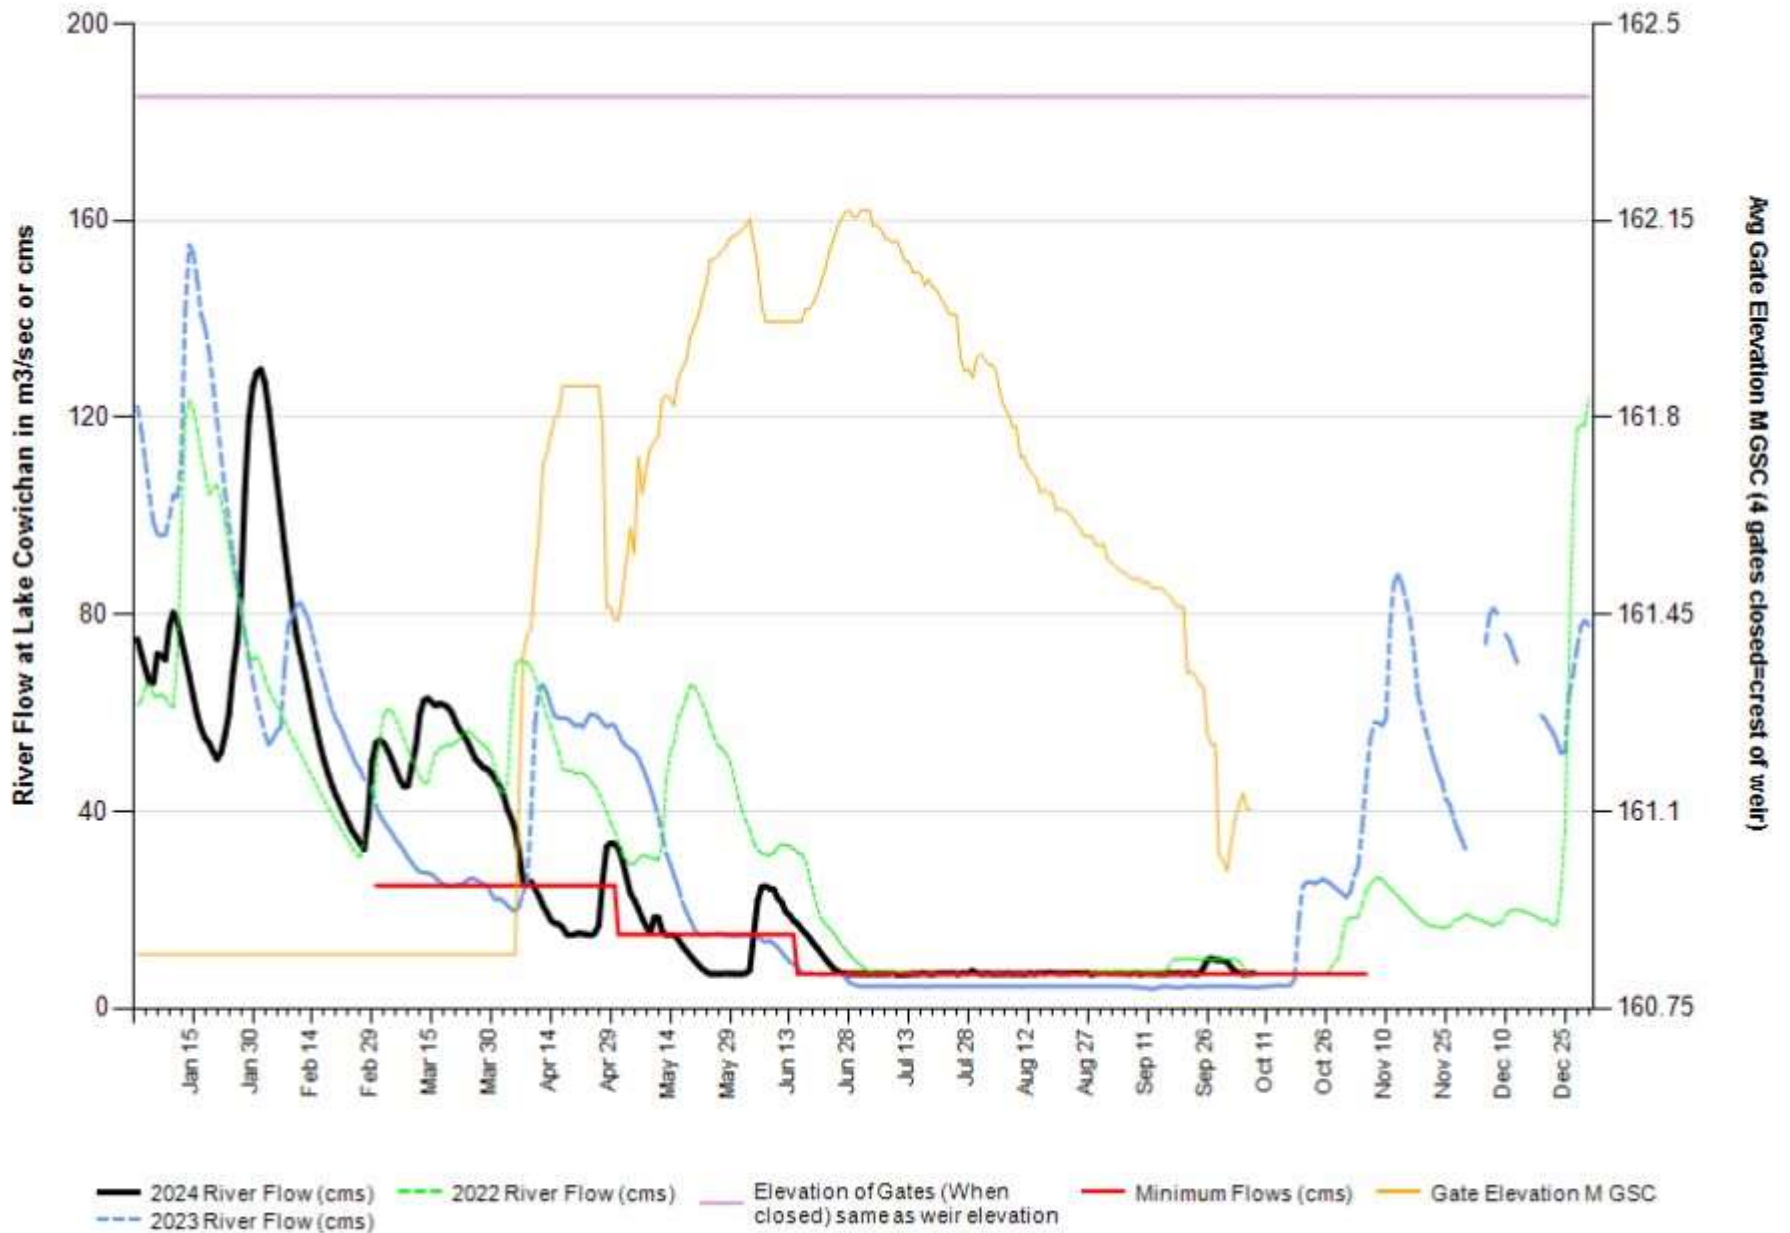

Please find attached the updated trends and area forecast.

Sincerely,
Jeremy Guthrie
