PRODUCTS

- Recycled bleach kraft pulp

MILL OVERVIEW

Menominee Recycled Pulp Mill in Michigan is a world-class deinking facility that produces 100% recycled bleached kraft pulp used in a variety of products to replace virgin fiber, including coated and uncoated paper, tissue, and packaging applications.

ENVIRONMENTAL CONTRIBUTIONS

- 100% of the mill's production is recycled bleached kraft (RBK) pulp, which is a sustainable alternative designed to replace virgin fiber in a variety of paper applications, upholding the same demanding performance specifications.
- The Menominee operation also:
 - recycles or reuses fluorescent light bulbs, batteries, antifreeze, oil and scrap metal;
 - runs a program to recycle electronics, such as phones, computers, cameras, printer cartridges and printers;
 - provides bioresiduals from the manufacturing process to individuals in the states of Michigan and Wisconsin for applications in agriculture, forestry and landscaping; and
 - has instituted the conversion of lift trucks from propane fuel to biodiesel fuel.

COMMUNITY INVESTMENT

- In 2025, mill employees achieved 2.5 million consecutive work hours without a single recordable injury, a feat dating back 12 years.

AWARDS AND CERTIFICATIONS
